Availability

Open to internships, 20 h/week · Pilsen or remote

Profile

Junior full-stack developer who sees things through to the last detail. Bachelor's in Computer Science from FAV ZČU (2026), now in the first year of the master's in Software and Information Systems. I enjoy the whole journey from the architecture through the backend and databases to the last detail of the interface – mostly in PHP (Nette), JavaScript (React, Vue) and Python, with MySQL, Git and Linux around it. I only call something done once it's tested and actually works.

Experience

Patrol leader and leader, regional leader since 2024
since 2018 | Klub Pathfinder, Jižní kříž region · member since 2012

- Leading the region: coordinating units and their leaders, keeping the regional accounts, running weekend events.
- Camps are my passion: I ran one as programme leader and two as head leader. Budget, programme, team, safety and logistics for dozens of participants.
- Working with children and teenagers, handling unexpected situations in the field.
- Courses: Patrol Leader Course (2020), Unit Leader Course (2024), Master Guide – the highest level of training in Pathfinder (in progress, until early 2027).

Frontend of a self-service kiosk
spring 2025 | Eurosoftware, now GK Software Czech Republic s.r.o. · team project, KIV/ZSW-E

- A kiosk where employees pick up products at company events. My part: the Vue.js frontend, NFC card sign-in, design and UX/UI.

Volunteer, security
since 2023 | United – Christian multi-genre festival

- Security at the United festival in 2023 and 2025; since 2023 I've also volunteered regularly at the smaller United City events.

Mechanical engineering placement
2021, 2022 | Automa CZ s.r.o., Strakonice – industrial automation, special-purpose machines

- Twice for 14 days: assembling a climate chamber for testing Audi car displays and a fixture for inspecting Renault displays from drawings and an Inventor model; hand-finishing machined parts; warehouse and documentation.

Education

Ing. Software and Information Systems (SWIS)
2026 – | Fakulta aplikovaných věd, ZČU v Plzni (Faculty of Applied Sciences, University of West Bohemia)
Master's programme, 1st year.

Bc. Computer Science
2023 – 2026 | Fakulta aplikovaných věd, ZČU v Plzni (Faculty of Applied Sciences, University of West Bohemia)
Bachelor's project: Open data and its analysis in spa towns for demography/education and tourism.

Computer Graphics and CNC Technology
2019 – 2023 | VOŠ, SPŠ a SOŠ řemesel a služeb Strakonice (Secondary Technical School, Strakonice)

Projects

CampMaster 3000 | React, Tailwind CSS, Recharts, Leaflet
Interactive dashboard for running a camp game – route editing on a map, team management and real-time scoring. campmaster-3000.vercel.app

Self-service kiosk | Vue.js, JavaScript, NFC, UX/UI
Kiosk for company events built for Eurosoftware – my part: the Vue.js frontend, NFC card login and UX/UI. (private team repo)

Information & community portal | PHP, Nette, Latte, Tailwind CSS, MySQL
Custom full-stack website for the Jižní kříž region of Klub Pathfinder: user login, event registration, media. github.com/ADCCZ/web_oblastni-stranky_jk

Open data in spa towns | Python, pandas, matplotlib, Power BI, pytest, Open data
Python pipeline over open data of nine spa towns: cleaning, metrics, 15 animated charts and 24 pytest tests. github.com/ADCCZ/bkp-tmwmf

Networked memory game | C, TCP/IP, JavaFX, Maven, Network protocols
Game for 2–4 players: a pure C server (TCP, select()), a JavaFX client and a custom text protocol. github.com/ADCCZ/tmwmf_sem_UPS

FoodApp "Délicious" | PHP, Twig, MySQL, JavaScript (AJAX), Bootstrap 5
Food ordering on a custom PHP 8 MVC without a framework – AJAX cart, admin, SQL injection and XSS protection. github.com/ADCCZ/web-foodapp

This website | Next.js, TypeScript, GSAP, Three.js, Tailwind CSS
This portfolio – Next.js, GSAP and WebGL shaders, built together with Claude Code. cv-oldrich-jan-svehla.vercel.app

Previous CV website | React, TypeScript, Vite, Tailwind CSS, Motion
My previous CV website – a playful 1970s office in React and TypeScript, built together with Claude Code. cv-oldjas-tan.vercel.app

Other semester projects: KMX computer emulator, Virtual file system, Parallel weather data processing, 3D game in OpenGL, Software testing (10 KIV/OKS assignments).

Technologies

Languages: Python, PHP, C, JavaScript, SQL, Java, C#, C++, TypeScript
Web & frameworks: HTML5 / CSS3, Nette, Latte, Tailwind CSS, React, Vue.js, Next.js, Twig, UX/UI design, Node.js – Express, Socket.IO, GSAP / Motion
Architecture & networking: MVC / MVP architecture, TCP/IP sockets, custom protocol, REST API, WebSockets – Socket.IO, Parallelism – OpenMP, OAuth 2.0, NFC
Databases & tools: Git & GitHub, LaTeX, MySQL, Linux WSL, Vite, Make / CMake / Maven, pytest / Robot Framework, Vercel, Docker, GitHub Actions (CI/CD), Playwright
Graphics & data: pandas / matplotlib, Open data, Power BI, OpenGL / OpenTK, GLSL, JavaFX, Three.js

Languages

Czech (native), English (B2), German (basics), Spanish (beginner)

Courses

- Patrol Leader Course (2020)
- Unit Leader Course (2024)
- Master Guide – the highest level of training in Pathfinder (in progress, until early 2027)
